

Easy Cast 2.0 C

Let us
print your
part!¹

EnvisionTEC's breakthrough Easy Cast 2.0 C is a specially blended photopolymer with an extremely high wax content to ensure consistent casting success. It is available exclusively for use with EnvisionTEC's cDLM technology.

The high wax content allows Easy Cast 2.0 C to be cast using normal burnout similar to injection wax, but this formulation also allows for exceptionally crisp details. From the smallest of pierced filigrees to the sharpest of corners on raised surfaces, Easy Cast 2.0 C produces breathtaking results not previously achievable with any other photopolymer wax product for 3D printing.

Material Properties ²	
Property	Easy Cast 2.0 C
Viscosity	200 cP @ 30°C
Density	1.08 g/cm ³ @ 25°C
Temperature @ 5% Weight Loss	263°C
Ash Content (after 900°C)	0
